

# Set Brackets

Set brackets, perfectly fitting the car, can be supplied for almost all cars now running.

With set brackets any inexperienced mechanic can make a perfect SAFETYLIGHT installation, because a template is furnished showing where to place the bracket on the car, a drill bushing is included and no filing or tools are required.

Set brackets should be supplied whenever possible.

Recommended jobbers stock of set brackets for every case of (25) Safetylights, for 1935 cars.

Dodge	50-4	52-23	52-23	Packard (1200 series)	73-23		
Duesenberg		9-1		Plymouth	50-4	52-23	52-23
Ford	66-23	55-4	55-4	Pontiac	68-23	50-4	F5-4
General Motors Truck	52-6	52-6		Reo		36-4	55-23
Graham	52R-4	9-23	9-23	Studebaker	60-4	60-4	6 1/4-1

If set brackets are desired for cars not specified, (older model cars, convertible or open model cars) order set brackets by specifying make, model and year of car.

For right hand installations order right hand lights and right hand brackets, specifying make, model and year of car.

## Universal Brackets

For the convenience of retailers with skilled mechanics, making installations on various makes of cars, two types of universal brackets are supplied.

Set 70-4 for most 1935 closed car models, and set 52-23 for most closed car models of previous years.

Templates are supplied with these brackets for such cars as they fit without filing.

For other cars these brackets can readily be filed to fit, however a set of mounting tools (price \$1.00 net) is necessary. Hence we recommend above 5 sets of 70-4 brackets, in addition to the set brackets, and 2 sets of mounting tools.
